

SINGLE USE RANGE

Our range of *Single Use Hollowware* offers a quality, cost effective solution in all areas of healthcare including custom pack manufacturing, operating theatres, clinical, nursing and ward applications.

SINGLE USE RANGE

Manufactured from high quality Polypropylene that is suitable for use in medical applications. ISO 9001:2016 Quality Assured and TGA registered.

- Denture Storage • Gallipots • Kidney Dishes • Instrument Trays
- Lotion Bowls • Medicine Measures • Procedure Trays • Sponge Bowls

Single Use Benefits

- Low purchase cost.
- Intended for use on one patient during a single procedure. Improves patient safety by eliminating the risk of patient-to-patient contamination due to item being discarded immediately after use.
- Supplied non-sterile, ready for use. Can be sterilised. ETO is recommended.
- Can be used as a stand alone item or as an inclusion into a pack or set for use within surgical procedures.
- Suitable for use in all medical and healthcare applications including operating theatres, clinical, nursing care and ward applications.
